Abstract (en)
[origin: WO8800913A1] A flexible container (1) for transporting or stocking lamps of material, dry bulk materials, ammunition, gases or liquids and the like is shaped as a hose having openings hermetically sealed by straight or linear clamping elements (14). The clamping elements are shaped as toothed racks, so that hoses with relatively large openings can be sealed with relatively short clamping elements. The clamping elements can be held by a tensioning element (31, 32, 33) in a container (10) or in a frame at a certain distance from the ground.
