Abstract (en)
[origin: EP0276713A2] The hair-tinting apparatus has an application aid (2), having an outlet opening (20) for a hair-tinting agent, for placing on top of a tinting-agent container (5) and it has an adaptor (3) which is connected between the application aid (2) and the mouth (6) of the container (5). The apparatus is closed by a tear-off film (14) which, in the first application, is destroyed by swivelling the application aid (2) about its axis (1) of rotation (Figure 1). <IMAGE>
