Abstract (en)

[origin: EP0276820A2] The container holder for containers with an edge flange arranged in two rows one above the other is formed from a single-piece cardboard blank and has a bottom wall (2) with openings (3, 4) for inserting the containers (25) of the bottom row. Projecting into these openings are flaps which are rotated by the containers and then grip below their edge flange. Provided for the upper containers (30) are end wall flaps (26, 27, 28, 29) which secure the containers against slipping out laterally. <IMAGE>
