Abstract (en)
A multiple-mode image duplicating apparatus having a plurality of groups of modes of operation, characterized by image reproducing means (24/26), first selecting means (310/326/332/338/342) for selecting a single group of modes out of said plurality of groups of modes of operation, second selecting means (324/328/330/334/336/340/344) for selecting a single mode of operation from the group of modes selected by said first selecting means (310/326/332/338/ 342), and control means for controlling said image reproducing means (24/26) to operate for the mode of operation specified by said first and second selecting means (324/328/330/334/336/340/ 344).
