Abstract (en)

[origin: EP0277100A2] The dust-bin (1), able to be withdrawn from a piece of furniture or other receiving space, comprises: a framework (13) bearing a housing (3) for a garbage-collection bucket (5), said housing (3) being provided with a cover (7) hinged thereto; on the sides of the framework, structural shapes (19) capable of sliding on guides (23) fastened on the bottom (25) of the piece of furniture or receiving space of the dust-bin (1) for the withdrawal therefrom; and an opening device comprising an inclined profile (39) cooperating with a tappet (47) during the relative sliding to cause the opening of the cover (7) and allow the closing thereof.
