Abstract (en)
So that the operating forces of the vehicle jack are as small as possible during cranking, it is designed in such a way that, to connect the two connecting rods (11, 12) in an articulated manner, there is a connecting joint (13) which establishes a certain angular position, differing from 180 DEG, of the two connecting rods (11, 12) during cranking. <IMAGE>

Abstract (de)
Damit die Bedienungskräfte des Wagenhebers beim Kurbeln möglichst klein sind, wird er so ausgebildet, daß zur gelenkigen Verbindung der beiden Kurbelstangen (11, 12) ein eine bestimmte von 180° abweichende Winkelstellung der beiden Kurbelstangen (11, 12) beim Kurbeln festlegendes Verbindungsgelenk (13) vorhanden ist.
