Abstract (en)
[origin: EP0277592A2] Bulletproof door element, the door leaf 1 of which consists partially of multi-layer wood which is formed from numerous thin hardwood veneers glued with fibre directions running crosswise, in which the multi-layer wood forms a central shell 2 which is connected on both sides to side shells 2, 3 made of thicker veneers which are bonded crosswise. The side shells 2, 3 are in each case at least a third as thick as the central shell 1. Advantageously, at least the vertical edge regions of the door leaf consist of edge bands 6 made of multi-layer wood, and at least half the frame 23 with covering 22 and decorative covering 24. <IMAGE>
