Abstract (en)  
1. Catalytic combustion device comprising a flask (1) containing a combustible liquid (2) a wick (4) plunging into the liquid and a burner (3) made from a porous material impregnated with a catalyst and to which the wick (4) is fixed, characterized in that the burner (3) comprises, at its lower part, an axial cavity (7) in which the wick (4) is engaged and, at its upper part, an annular cavity (6) whose outwardly turned wall (3a) has received the catalyst.

Abstract (fr)  
Brûleur à combustion catalytique en matière poreuse. Ce brûleur comprend, à sa partie inférieure, une cavité axiale (7) dans laquelle peut être engagée la mèche (4) destinée à amener le combustible au brûleur et, à sa partie supérieure, une cavité annulaire (6) dont la paroi (3a) tournée vers l'extérieur a reçu un catalyseur.
