Abstract (en)  
[origin: EP0278225A2] In a short-inking device with at least one transfer roll designed as a screen printing roll (3), a compact form of construction together with a reliable and precise inking operation is achieved by the provision of at least two mutually offset doctor blades (11, 12) the provision of in the circumferential direction of the screen printing roll (3), both of which lie against the circumference of the screen printing roll (3) with a negative incident angle and which limit in the circumferential direction an ink chamber (13) sealed by impermeable side pieces lying against the screen printing roll (3), and by the provision in the area of the walls of the ink chamber (13), of at least one inflow aperture (19) which can be connected to an ink supply (16) in a pressure-tight manner, and of at least one overflow opening (24 or 35). <IMAGE>
