Abstract (en)

[origin: EP0279341A1] In the method for affixing rims to the edges of building panels made of mineral material, the edges (2) of the building panel (1) are provided with at least one groove. The groove is filled with hot-melt adhesive (3), adhesive (4) is then applied to the edge in the usual way and the rim (5) is pressed onto this adhesive. <IMAGE>
