Abstract (en)  
[origin: EP0280036A2] In a transport device for a web-like recording carrier (12) from a supply reel (14) through a printing station to a driveable take-up reel (18), where the supply reel (14) and the take-up reel (18) are mounted in a removable manner, the shaft (30) of the take-up reel (18) is mounted in a detachable manner in a pivoting element (32), which is mounted upon a bearing frame (10) accommodating the supply reel (14) and the drive (52) for the take-up reel (18) so as to be able to pivot about a pivot axis (42) parallel to the axis of the take-up reel (18) between an operating position and a change-over position, with the drive consisting of a driving wheel (52), the circumferential surface of which is intended to make contact with a circumferential surface (54) of the take-up reel (18). <IMAGE>
