Abstract (en)
[origin: EP0280107A1] 1. A water/air radiator with radiator tanks of plastic material and a compensator reservoir (4) of plastic material mounted on the upper radiator tank (2), both being provided with mutually correspondingly designed and mutually insertable connection pins (5, 6) and equipped with snap-in hooks (7) on a part, which snap-in hooks (7) engage behind corresponding engagement edges on the longitudinal sides of the other part, characterized in that the connection pins are designed as hollow connection pieces (5, 6) which fit inside each other, in that the snap-in hooks (7) face each other diametrically to the axis (27) of the connection pieces, and in that the engagement edges are provided on eye hooks (8) gripped through by the snap-in hooks (7), which eye hooks (8) are designed as laterally protruding brackets and act as mounting surfaces for the compensator reservoir (4).
