Abstract (en)

A container liner (40) includes an upper wall (42), a bottom wall (44), a rear wall (46), side walls (48, 50) and a front wall (52) to form a hexahedron and has mounting arrangements (64, 66, 68) for mounting the liner (40) to inner walls of a container. The liner (40) includes a box-like member (86) forming at least the outer surface of the bottom wall (44) and of the lower portions of the rear wall (46), the side walls (48, 50) and the front wall (52). The box-like member (86) comprises a bottom made of a middle portion of a single cloth member and side walls made of outer portions of the single cloth member folded upright relative to the middle portion of the single cloth member. Corners of the box-like member (86) can be reinforced by ears formed by corner portions of the single cloth member.
