Abstract (en)
In the cutting press, it is intended to process separate raw materials (9,17) and join them together. For this purpose, separate pairs of workpiece carriers (3,6; 18,20) are provided with separate guide means (7,21). The drives for the respective movable workpiece carriers are synchronised with one another. The feed direction (A) of the main strand (9) is in the main work direction of the relevant pair of workpiece carriers (3,6), as a result of which the guide means (7) are protected in an optimum manner. <IMAGE>

Abstract (de)
An einer Stanzpresse sollen gesonderte Rohmaterialien (9,17) bearbeitet und miteinander verbunden werden. Hierzu sind für gesonderte Paare von Werkzeugträgern (3,6; 18,20) gesonderte Führungseinrichtungen (7,21) vorgesehen. Die Antriebe für den jeweils beweglichen Werkzeugträger sind miteinander synchronisiert. Die Zufuhrriichtung (A) des Hauptstranges (9) liegt in der Hauptarbeitsrichtung des betreffenden Werkzeugträgerpaares (3,6), wodurch die Führungseinrichtungen (7) optimal geschont sind.
