Abstract (en)

[origin: EP0281958A2] A hood (1) which corresponds to the area of the microtitration plate (2) is formed as a hollow space closed on all sides. A gas line (4) leads into the hollow space. Its boundary wall (5) facing the titration plate (2) is provided with gas outlet orifices (6) which are arranged eccentrically relative to the axes of the vessel and point under an angle to the surfaces of the liquids. <IMAGE>
