Abstract (en)

[origin: EP0282888A2] A cop (10) for winding up yarns (15) especially for dyeing, scouring or the like, comprising a cylindrical hollow body (11) having an outer yarn winding surface (12) on which the yarn is wound and held in place by the action of a drive roller (16); at each end of the yarn winding surface the cylindrical body of the cop (10) has an outwardly protruding annular band (14) defining a resting surface for the drive roller (16) at the beginning of winding.
