Abstract (en)
The invention relates to a synthetic soap which comprises a binder consisting of a mixture of one or more glycols, one or more alkali salts and one or more higher fatty acid derivatives having from about 12 to about 22 carbon atoms. Said binder may as well consist of a mixture of one or more glycols and one or more alkali soaps of one or more higher fatty acid derivatives having from about 12 to about 22 carbon atoms. The glycols used are preferably chosen from the group consisting of the lower glycols and the lower polyglycols.
