Abstract (en)
[origin: EP0283351A1] The terminal, disposed in a housing (2) of a casing of a modular device, has a cage (8) with an internal screw thread for the manoeuvring screw. The conductive terminal part (12) has an emergent end (14) surmounted by an emergent end (19) of a solid reinforcing part passing, into the housing, on the other side of the terminal part in order to bear on one end (21) of a link wire (20) whose emergent and bent end (22) grips the busbar and clamps it against the assembly of the emergent ends (14,19). <IMAGE>
