Abstract (en)

The individual lying surfaces (2) are provided at their corners with catch devices (3) which can be engaged in the support posts (1). The catch devices are constructed in such a way that the lying surfaces (2) can be engaged in the support posts both in a horizontal and in a vertical position. By this means, the lying surfaces in the vertical position can also be used as partitions for room division. To set up the emergency bed system, only few manipulations and virtually no tools are required. <IMAGE>

Abstract (de)

Die einzelnen Liegeflächen (2) sind an ihren Ecken mit Rastvorrichtungen (3) versehen, welche in die Stützpfosten (1) einrastbar sind. Die Rastvorrichtungen sind derart beschaffen, dass die Liegeflächen (2) sowohl in horizontaler wie auch in vertikaler Lage in die Stützpfosten einrastbar sind. Dadurch lassen sich die Liegeflächen in vertikaler Lage auch als Trennwände zur Raumunterteilung verwenden. Für den Aufbau der Notliegen-Anlage sind nur wenige Handgriffe und praktisch keine Werkzeuge erforderlich.
