Abstract (en)

[origin: EP0284024A2] A container is provided for recovering a treating liquid as a spent liquid. The container has an outer box (1) and a flexible inner bag (7) held within the outer box (1) and having a partition wall (8) by which the interior of the inner bag (7) is divided into a treating-liquid storage chamber (9) and a spent-liquid storage chamber (10), in which the storage chambers (10, 9) each have an access port (2, 3) through which each is connected to an outer associated apparatus.
