Abstract (en)
An ink-jet recording process is provided which comprises applying inks to a recording medium having at least an ink-transporting layer and an ink-retaining layer, from the ink-transporting layer side of said recording medium, and thereby forming with a plurality of ink dots a unicolored area observable from the ink-retaining layer side, the dots being formed respectively by application of at least two ink droplets in superposition. A mixedly colored area can be formed in a similar manner.
