Abstract (en)

[origin: US4817249A] A clothing ornamentation device adapted to be fitted to a button inserted in a buttonhole including a cylindrical body which is hollow on the inside in order to house or maintain in position a button so that the periphery of the latter can serve as a guide and its axis serves as a rotation axis for the cylindrical body. One end of the body serves as a decorative device or support therefor, and the second end being provided with a perpendicular strip forming a lug substantially in the direction of the generatrices of the cylindrical body and constituting the start of an open ring parallel to the second end terminating in a short ramp provided with a dull point.
