Abstract (en)

[origin: EP0284486A1] A device for dispensing paper assembled into a block of paper (6) cut into pre-folded sheets of paper, arranged removably in a casing (1) with a substantially horizontal base (2). <??>The said casing (1) contains at least one object (7; 8) of a predetermined minimum weight, resting freely on the top (9) of the said block of paper (6) and providing an elongated space (10), which is at least approximately central, forming a guide slot for each sheet of paper, the removal of one sheet automatically engaging the following sheet of paper in the said guide slot. <??>The invention is applicable to the dispensing of paper such as, in particular, toilet paper. <IMAGE>
