Abstract (en)

[origin: EP0284531A1] A device (2) for controlling the opening and closing of an outwardly pivoting leaf (3) of a door or window, comprising an operating handle (6), such as a crank or the like, arranged on the frame (4) and actuating means of translational movement (12), these driving means (11) for the rotation of the leaf (3) interacting with second means of translational motion (46) connected to the latter and making it possible to impart to the axis of rotation of this leaf (3) a translational movement parallel to the plane of the frame (4). <IMAGE>
