Abstract (en)
[origin: EP0284864A1] A transparent top layer (2) is attached to a base (1) in two corner pockets (4, 5) on one side (3). Provided for the attachment in the corner pockets (4, 5) are welding figures (6) serving as attachment elements which engage in recesses (7) in the transparent top layer (2). The transparent top layer of the base can easily be exchanged even when using a stiffer material. Furthermore, an insert (8) of cardboard, paper or film can be arranged between the transparent top layer (2) and the base (1), which insert is likewise held by recesses (7) on the welding figures (6) in an easily exchangeable manner. <IMAGE>
