Abstract (en)
[origin: EP0285468A2] Weapon or weapon system, especially a mine, mine launcher or launcher of anti-tank projectiles, which comprises particularly an aiming or pre-aiming mount, a launching tube closed in its rear part, a projectile and a propellant charge, said weapon or weapon system being characterised in that said tube (2) is connected to said mount (1) by means of a cradle (7) arranged in such a way as, after said propellant charge (4) has been ignited, to allow the uncoupling of this tube from said cradle and its free recoil, at least during the main part of the travel of said projectile (3) in the core of said tube. <IMAGE>
