Abstract (en)

Covering and/or cladding element, comprising a plate of cellular material having good thermal insulation properties and a coating skin integral with the said plate, the said coating skin providing, over at least one edge of the element, a strip which is projecting in relation to the edge of the plate which it borders. The said strip (30) is disposed substantially in the plane of the face (14) of the plate (11) opposite that carrying the coating skin (12), the said strip serving to attach the element to an underlying support (S) with the aid of mechanical means such as nails, screws, pins or the like. Application: roofing and/or facade of buildings. <IMAGE>

Abstract (fr)

Élément de vêtture et/ou de couverture, comportant une plaque de matériau alvéolaire à bonnes propriétés d'isolation thermique et une peau de revêtement solidaire de ladite plaque, ladite peau de revêtement ménageant sur au moins une rive de l'élément une bande en saillie par rapport au bord de la plaque qu'elle longe. Ladite bande (30) est disposée sensiblement dans le plan de la face (14) de la plaque (11) opposée à celle portant la peau de revêtement (12), la dite bande servant à la fixation de l'élément sur un support sous-jacent (S) à l'aide de moyens mécaniques comme des clous, des vis, des chevilles ou analogues. Application : Toiture et/ou façade de bâtiments.
