Abstract (en)

The invention relates to a stimulable phosphor sheet comprising a support, a phosphor layer containing a stimulable phosphor and a binder, and a protective film superposed in this order, which is characterized in that at least both sides of the phosphor layer along the direction to be conveyed are retracted from the corresponding side edges of the support, and both of said side edges of the phosphor layer and support are protected by a polymer coating layer, a polymer film, or a solid material.
