Abstract (en)

A display control unit is combined with a display device including X and Y side electrodes and a display element sandwiched between the X and Y side electrodes. The display control unit (Fig 21) includes a plurality of lines (V3,VC,V4) for supplying voltages having different values to the X and Y side electrodes (S1-S80), a switch (270) for connecting the lines with the electrodes or disconnecting the lines from the electrodes, and a unit(250) for controlling the switch within a selection period of the X or Y side electrodes.
