Abstract (en)

[origin: EP0286497A1] 1. Sealing device for a vehicle opening panel, particularly for a side door, which comprises a sealing extrusion (4) applied to the edge (1a) of the panel (1), characterized in that the extrusion (4) is interrupted in line with an emergent element (3) and in that a moulded seal (5) is disposed on the edge (1a) of the panel about this emergent element (3) so as to provide sealing continuity.
