## Abstract (en)

[origin: EP0286825A2] A method of treating viral diseases in a human subject is disclosed. The method involves applying effective amounts of the compound: <CHEM> wherein X is an azido group, a methoxy radical or a fluorine atom and B is thymine, uracil, guanine, cytosine, purine or hypoxanthine if X is methoxy or fluorine, and B is guanine, purine or hypoxanthine if X is azido or a pharmaceutically acceptable salt thereof. Also disclosed are compositions and compounds useful in the method.
