Abstract (en)

Built in a workshop on the basis of forming respective upper and lower slots (11) and (12) in support members (10) close to the ends thereof, to allow the insertion of other front members (13), the width of which will depend on the spacing between said slots (11) and (12) as well as on the height of the bleachers to be built and, where it is desired to build a vertical wall, the slots (11) and (12) are located on the same vertical plane, with the height of the front members (13) having to be equal at least to the distance between the upper slot of the upper support member and the lower slot of the immediately superior support member and at the most equal to the distance between the upper slots of the two immediately contiguous support members located in different horizontal planes.
