Abstract (en)
[origin: WO8802225A1] Fastener, particularly for bracelets, allowing in addition to the closing of the bracelet, the adjustment and locking of the latter. The fastener comprises a first element consisting of a plate (30) provided with a bolt (33) and presenting connection means at one end of the bracelet and a second element comprising a cage (35) wherein at least one transverse slide (38) is elastically biased to hook onto the bolt (33) and presenting retainer means at the other end of the bracelet for adjusting the latter, the fastener being characterized in that a movable clamping plate (40) co-operates with said second element.
