Abstract (en)

[origin: EP0287796A1] Heavy and residual oils, spent and waste oils are hydroconverted by liquid-phase hydrogenation. <??>The mixing of waste oils or waste materials with the hydrogenation feed products is intended to allow re-use in place of disposal in landfills or combustion. <??>Mixtures of heavy or residual oils with spent and waste oils and also waste materials containing organic constituents are used in certain weight ratios, an additive within certain grain size ranges being present.
