Abstract (en)
[origin: EP0287799A1] 1. Fitting (1) for doors or the like which are equipped with a lock cylinder (17), with a base plate (2), which is to be fastened on the door surface, has a lock cylinder receiving opening (18) and bears a sliding cover (5), which is guided on the said base plate, can be displaced out of its shut-off position covering the lock cylinder receiving opening (18) and is provided with an additional lock (magnetic lock 31), characterized in that a bolt element (20), spring-loaded in the advanced position, is mounted on the base plate (2) and, when the sliding cover (5) is in the shut-off position, moves with its blocking end (21) behind a blocking step (blocking opening 25) which is assigned to the sliding cover and in that, for releasing the sliding cover (5), the engagement behind the step can be discontinued by operating the additional lock (magnetic lock 31).
