Abstract (en)
[origin: EP0287963A2] The cardboard package has four surrounding walls, which are constructed as front and rear wall and as side walls, and a covering surface and a bottom. The front and rear walls are of trapezoidal shape and are connected to each other via a side wall. In a first stage, the package is constructed as a dish which is open at the top and into which an inside bag is placed. Then the rear wall is folded up and glued while the bottom, formed from two flaps, is merely folded, the two flaps being hooked onto one another. <IMAGE>
