Abstract (en)
A drawer assembly comprising a drawer adapted to be mounted on roller runner assemblies (22) or on fixed runners (11), the drawer comprising separate back (5A) and side members (5) interconnected by corner pieces (15) at the rear corners of the drawer, said corner pieces incorporating stop members co-operable with projections on said fixed runners to limit outward movement of the drawer on the runners during normal operation, and the drawer side panels incorporating longitudinal channels or recesses adapted to receive either of said forms of runner and so constructed that the stop members on the corner connectors do not interfere with operation of the roller runner assemblies when the drawer is fitted therewith.
