Abstract (en)

[origin: EP0289378A1] The invention relates to the covering of textile articles. <??>Its object is to provide a textile support which makes it possible to accept a greater variation of the distance between the needle (8) and the cloth (2) during the basting operation. <??>The textile support according to the invention is of the purl knit or weft purl knit type and comprises, distributed over at least one of its faces, thread portions (4) in relief in relation to the free surface (5) of this face.
