Abstract (en)

[origin: EP0289875A1] The invention relates to a method and a device for cleaning foreign bodies, such as metal shavings or the like from a preceding metal- cutting production process, from work pieces. The work pieces (4) are dipped into a washing container (1, 2) and compressed air, which rises upwards in the washing liquid (20) due to buoyancy, is blown in at the bottom (19) becomes attached to foreign bodies (17) on the work piece (4) and drags the said foreign bodies with it upwards as a result of buoyancy. <IMAGE>
