Abstract (en)

[origin: EP0290070A1] In a roll-type cover (3) for a dry shaver, which serves to cover or free a screen shaving foil of the dry shaver as desired and which consists of a flexible support (11) and transverse webs (10) spaced apart from one another, the transverse webs designed rigid per se are, seen in the longitudinal direction of the roll-type cover, at least partially encased one after the other by the flexible support (Fig. 1 and Fig. 5). To make such a roll-type cover, two-stage injection- moulding processes are provided. <IMAGE>
