Abstract (en)
1. A dry-shaving apparatus comprising at least one slidable shutter (3) for optionally covering or exposing a shear foil (7) of the dry-shaving apparatus, characterized in that in a dry-shaving apparatus comprising a shavinghead frame (2) which carries the shear foil (7) and which is detachably secured to a basic apparatus (1) by means of at least one resilient latch (12) the shutter (3) is slidable onto the shaving-head frame and the shear foil from a position on the basic apparatus in which it exposes the shaving-head frame (2) and the shear foil (7), and in that the shutter (3) prevents the latch (12) from being moved in order to detach the shaving-head frame (2) from the basic apparatus when said shutter is slid at least partly out of its position in which the shaving-head frame and the shear foil are exposed.
