Abstract (en)

Along a peripheral edge (7) of its extreme face (4), the polyethylene support (2) has a hooked (16') attachment means (19) for the purpose of holding against this extreme face (4) a plastic washer (9), for example of polystyrene, to which the foam block (13) may be fixed by cold adhesive bonding, the channel (10) of this washer (9) being dimensioned to suit the desired rate of delivery of a product for spreading, and the foam block (13) being solid, with no central channel. <IMAGE>
