Abstract (en)

The present invention relates to a unit for igniting and feeding a hearth and to the method of employing it. It is characterised in that it consists of a package (5) containing solid fuel (1), kindling fuel (2) and a lighting device (3) + (4). The unit is placed in a hearth upside down and sloping at approximately 45 DEG towards the back of the hearth. The unit is particularly intended for being employed in the form of inserts or cassettes (front-stoked hearths). <IMAGE>
