Abstract (en)
[origin: EP0290426A2] Cladding for building walls, consisting of an insulating layer, a plaster support, in the manner of a facing shell, having a reinforcement or a lath, and of a number of anchors fastened to the building wall and penetrating the insulating layer, the reinforcements or laths (31) being constructed as rigid panels which are held in contact with the insulating layer by means of the anchor legs (4, 1) which are fastened to the building wall and, in a manner known per se, directed obliquely downwards at an angle less than 45 DEG with respect to the building wall. <IMAGE>
