Abstract (en)

[origin: EP0291973A2] Link (10, 10') with two angularly adjoining profile bars for window or door frames, which is mounted on the outside of a frame bar and is fastened thereto with a connection part (20) which traverses this frame bar and engages in a central body (11) of the link (10, 10'), which is inserted end on into a cavity of a crossbar, on which the link (10, 10') is likewise fastened. In order to improve the link in such a way that it can also be used in the case of a cross-sectionally small design and in particular for narrow crossbars, the central body (11), which is made of plastic, of the link (10, 10') has a metal body (12) which reinforces said body (11) and in which the connection part (20) engages. <IMAGE>
