Abstract (en)
[origin: EP0292462A2] A can with a removable cover (6) provided with a dish (34) intended to act as a housing for a small plate (12) held thereon by a rim (13) of smaller diameter than the small plate (12). This small plate (12) has a visible surface which has the appearance and the colouring of the abovementioned covering. The cover (6) has, just beneath its peripheral edge (14), an annular cavity (15) with a rounded bottom. This cavity faces towards the axis (16) of the cover (6) and is intended to serve as a housing for the rolled toric part (12) of an annular piece (7) which caps the end (5) to be closed off of the body of the can. The cover (6) is held in place by a locking and sealing ring inserted in a groove (20) running around the peripheral edge (14) of the can. <IMAGE>
