Abstract (en)

[origin: EP0292632A2] A resilient tensioner device (1) for a Jacquard machine for the production of Jacquard weaves, comprises a sheath (2) the upper end of which is connected to an upper filiform element (3) which can be hooked onto the wires (4) of the Jacquard machine which are slidable in upper guide battens (6). In the sheath (2) is housed a tension spring (15) operatively connected to a lower filiform element (16) projecting from the sheath (2) and provided at its free end with coupling means (20,21,22) for anchorage to a lower batten (18).
