Abstract (en)

[origin: JPS6480693A] PURPOSE: To form the entirety of a device extremely flatly, and thereby enable it to be attached in a thin wall by introducing a pulling strap laterally piercing through a grip trough arranged in parallel with a strap winder drum on a base plate. CONSTITUTION: A grip trough 2 is disposed on a base plate 1 at the side of a drum 11 in a parallel therewith. Following this, a pulling strap 3 drawn out of a strap winder drum 11 is guided by guide rollers 10, 9, 8 so as to laterally pierce through the grip trough 2 via an openings 5, 4. In addition, the pulling strap 3 is guided in a manner that its belt face comes to be vertical with respect the rotation shaft of the strap winder drum 11 to then be passed through a strap tightening device 6 provided in the vicinity of one opening 4 of the grip trough 2. This can make the length of the pulling strap 3 sufficient with relatively short one, and also make a diameter of the strap winder drum 11 smaller than usual.

Abstract (de)

Der Gurtwickler besitzt eine Grundplatte (1) mit einer seitlich neben der üblichen, federgespannten Gurttrommel (11) angeordneten, vom Zuggurt (3) quer durchsetzten Griffmulde (2), wobei der Zuggurt von der zu betätigenden Vorrichtung über eine Gurtklemmvorrichtung zur Griffmulde und von dieser über Umlenkrollen zur Gurttrommel verläuft, so daß der Gurtwickler infolge seiner relativ flachen Ausbildung in einer dünnwandigen Sturzfläche über einem Dachfenster versenkt anbringbar ist und so eine bequemere Bedienung ermöglicht.
