Abstract (en)

A pair of snappingly engageable members of identical shape each comprises a base (16) having a pair of male snap legs (19) disposed on one surface thereof in spaced confronting relation to each other, the male snap legs (19) having bulging portions (24), respectively, projecting laterally away from each other, and a pair of female snap legs (20) disposed on said one surface in spaced confronting relation to each other, the female snap legs (20) having a pair of locking portions (27), respectively, projecting laterally toward each other, the bulging portions (24) and the locking portions (27) having longitudinal ends confronting each other. When the snappingly engageable members are put together, the male snap legs (19) on the base (16) of one of the snappingly engageable members snappingly engage the female snap legs (20) on the base (16) of the other snappingly engageable member, and the female snap legs (20) on the base (16) of said one snappingly engageable member snappingly engage the male snap legs (19) on the base (16) of the other snappingly engageable member.
