The rope curtain has a rope (4) which is attached at one end to a bearing element (1, 31) and at the other end to a tensioning element (3). Arranged between these elements (1, 31, 2) is a further bearing element (2), in which the rope (4) is deflected around 90 DEG . The tensioning element (3) is screwed to a side wall (6) below the bearing elements (1, 31, 2). The tensioning element (3), which is to be mounted at an easily accessible height, has an insert (17), to which the rope (4) is attached and which is screwed detachably to a bearing part (16). <IMAGE>
